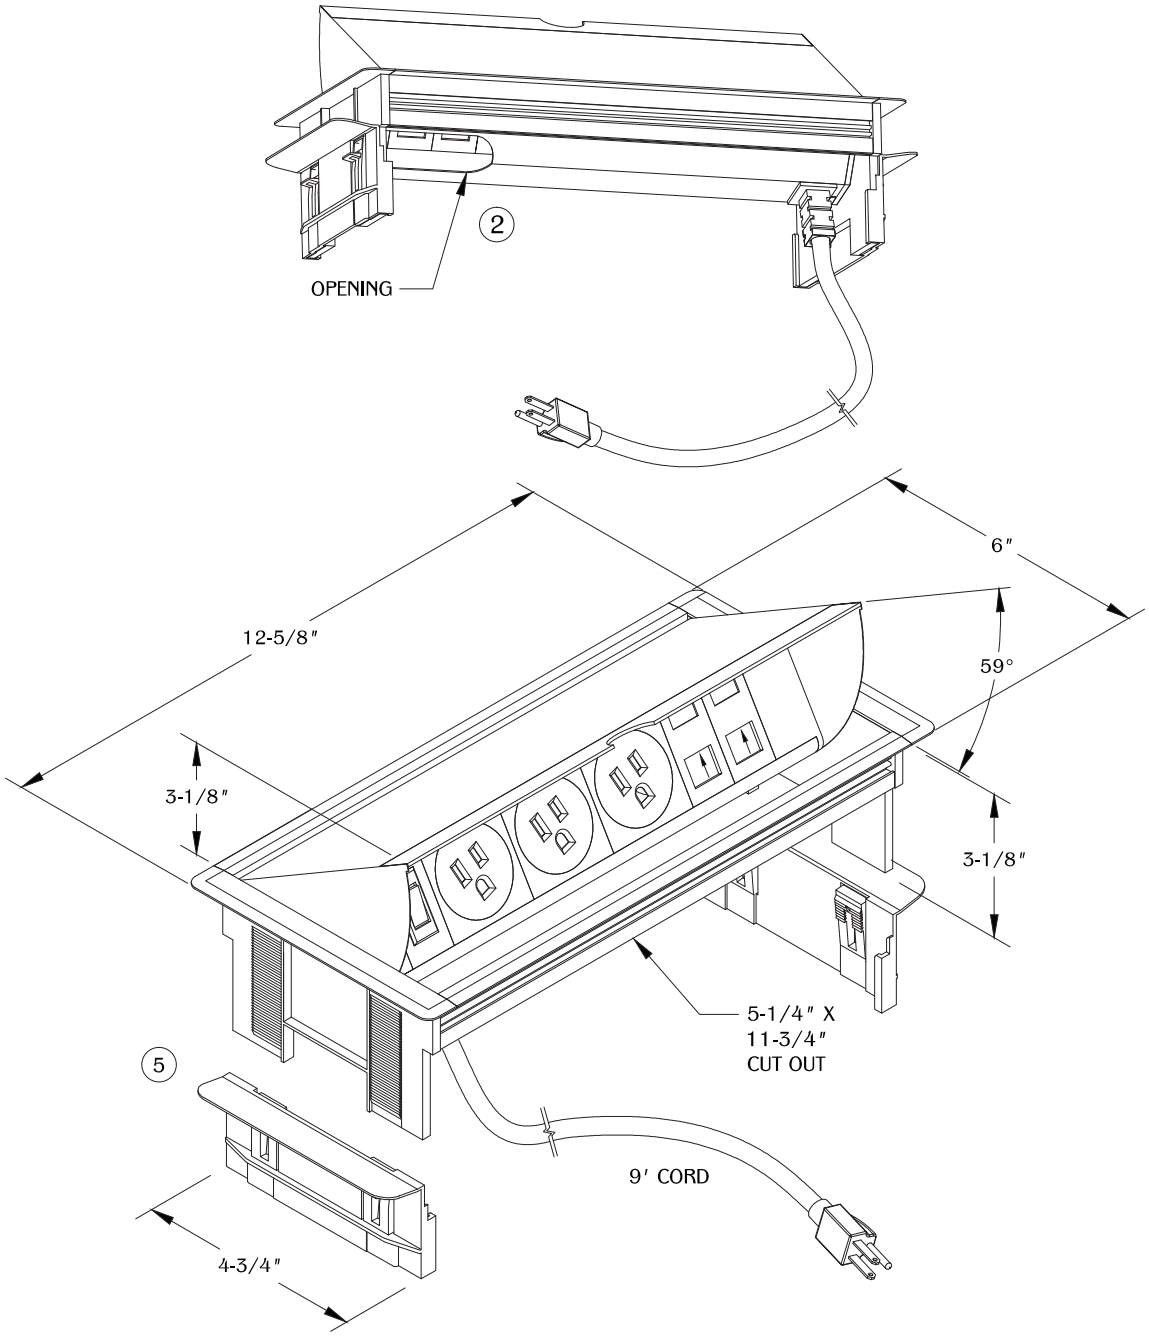
# Installation Instructions
# PDC-MO-300

1. Pop out data clips by inserting a screw driver into module and carefully popping the module out.
2. Run data wires through the back and insert wire into CAT5E data. (2)
3. Make a 5-1/4" X 11-3/4" cut out.
4. Insert PCS21/M, data cable and plug cable.
5. Carefully slide clippers to lock unit into place. (5)


NOTE: Unit comes with an option bottom cover; to install you must unassembled sides and slide both end in.
